About D.U.M.S of Unani Medicine & Surgery (D.U.M.S.)

Unani System of Medicine & Surgery is one of the oldest medication systems in the world. Unani System originated in Greece and from there the system of medication was adopted by Middle-East and South-Asian countries.

B.U.M.S is a five-year undergraduate degree program that deals with the medical knowledge and applications of the Unani system and surgery. Unani system of medicine is different from regular medications (allopathy). In this, the healing process is done through the natural processes/ natural power of the body. As per the Unani System, the body has the power to heal itself. All that the human needs to do is identify the healing power within themselves and enhance it. It is known for treating various deadly diseases and disorders in a natural way as every man in the modern age is inflicted with the stress and anxieties which is a root cause of various diseases.

The system of medicine has been in practice since 6,000 years and is mainly based on the four components that are: earth, fire, water, and air. It is known for the treatment of weight loss, kidney stone, diabetes, psoriasis, arthritis and others.
